Source paper
Intervention / context
Directional claim
Reported outcome
Cross-paper synthesis
10.1002/ adfm.202104251
2D-3D perovskite film
INHIBITS Cl evaporation
Effective bulk passivation
10.1002/ adfm.202107650
Higher band offset + lower trap density
REDUCES non-radiative recombination
Lower voltage deficit (0.43 V)
10.1002/ adfm.202107650
IPH interlayer
ENHANCES charge extraction
Higher short-circuit current density
Candidate synthesis
performance and stability pathways
Evidence-linked paper-reported path
Cross-paper synthesis hypothesis
